# Digitalization is changing everything ... ...and needs a holistic approach

# A holistic view on technology for industrial Digitalization

**SIEMENS**  
*Ingenuity for life*

# Industrie 4.0 is driven by the needs of our customers

## Customer needs

PLATTFORM  
**INDUSTRIE4.0**

## Enabling Technology

**Let's make it concrete!**

# Edge devices bring intelligence, flexibility and fast innovation

## Edge Management

- Device Management
- App-Management
- App-Store

**Edge Apps** developed by Siemens, customers, partners (OEM), 3<sup>rd</sup>-party

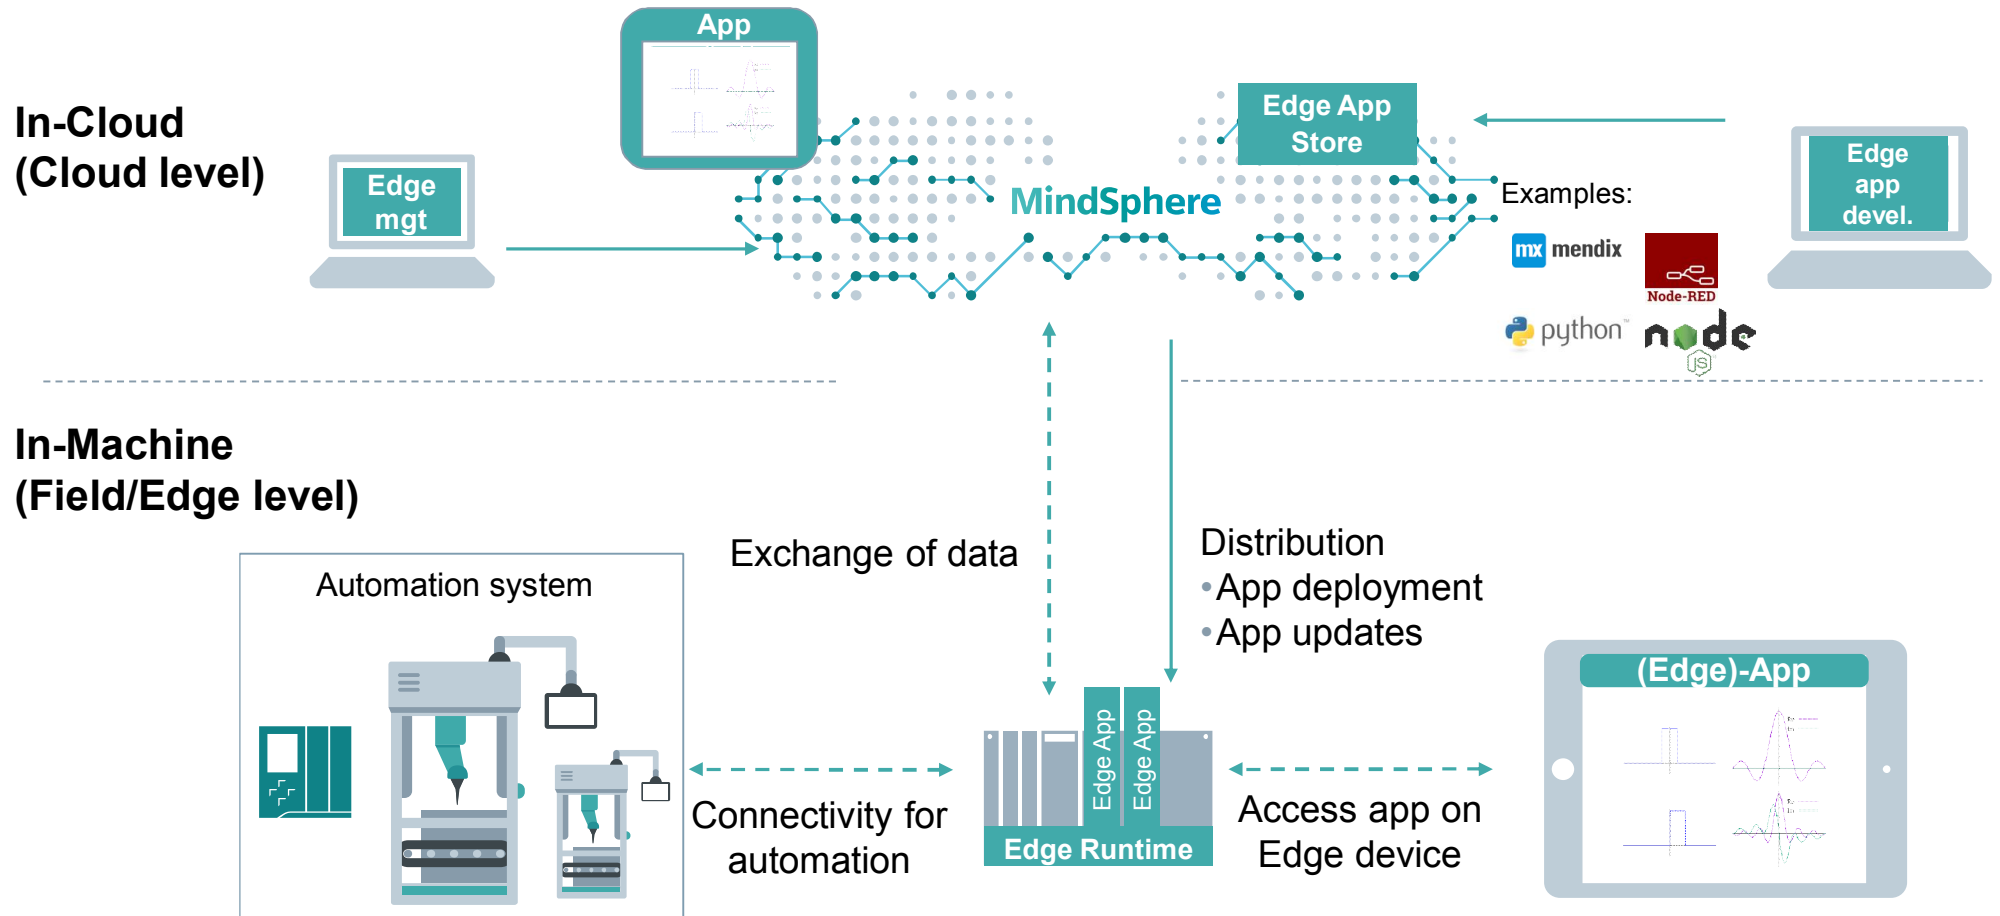

**Selected data:** M2M communication, non RT optimization,...

## Edge Devices

Secure and decoupled edge runtime infrastructure for edge apps

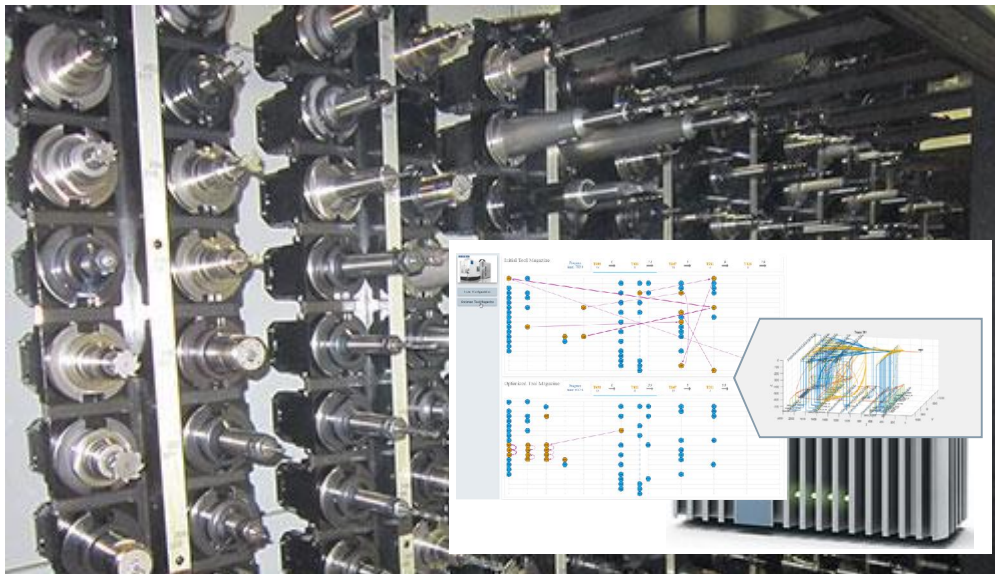

# Architecture of the industrial edge in manufacturing

# SINUMERIK Edge – an open system to provide local machine intelligence as add-on functionality

## Manage MyResources / magazine optimization

Optimize tool placement in large magazines  
⇒ Shortened idle times in machining

## Analyze MyWorkpiece

Machine awareness: detecting incorrect or displaced workpieces  
⇒ Preventing machine damages and faulty workpieces

## Implementing “data driven services” to optimize service delivery and to generate new business

**SIEMENS**  
*Ingenuity for life*

### Motivation

- Optimizing service delivery via remote access
- New service offerings and new business models

### End-customer benefit

- Higher uptime, more efficient service
- Faster access to innovation

### Implementation – connecting assets to Mindsphere

- Providing/implementing basic network connectivity to assets where not yet available
- Configuration to allow remote access (@Sinumerik, network)

⇒ Mindsphere enables connectivity and provides applications for Industrie 4.0 businesses

## Industrie 4.0 @ work in India – transforming the manufacturing process of low voltage switchgear at Kalwa Works

**SIEMENS**  
*Ingenuity for life*

>**180** product variants in **1** line

~**9** sec cycle time in spite of varied product-mix

**68** quality parameters check in **9** secs

**Local** for **local** & **global** market

**Where to find technologies  
and help for my future  
digitalization business?**

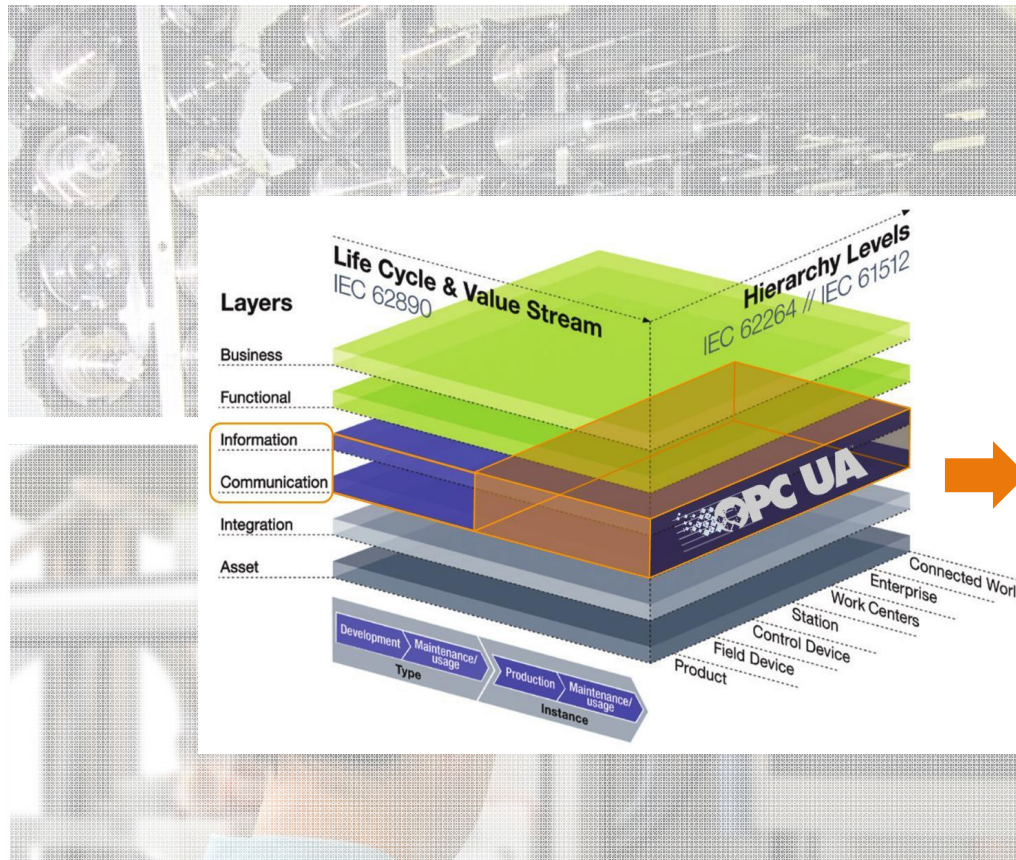

# Industrie 4.0 is becoming reality with OPC-UA as its backbone for communication and information modeling

**SIEMENS**  
*Ingenuity for life*

# Industrie 4.0 is becoming reality with OPC-UA as its backbone for communication and information modeling

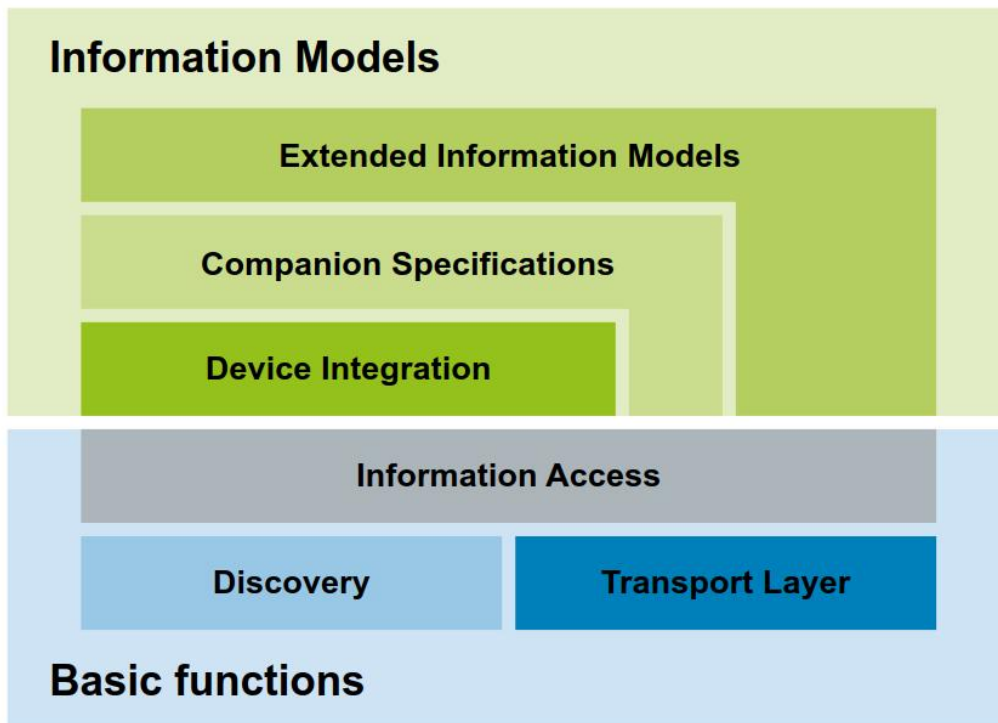

## Standardized Communication „How“

- OPC UA: provided by OPC Foundation. Open Source
  - standardized data connectivity method in automation
  - establishing itself as the leading IoT standard in the manufacturing industry
- ⇒ basic prerequisite: IP based network

## Modeling data structures „What“

- Standardized information models (Companion Specifications for OPC UA): core functionality of machines from different vendors
  - standardized to enable easy integration, uniform usage and interoperability of machines.
- ⇒ provided by industry associations, e.g. robotics, machine vision, machine tools

# Connecting assets and enhancing data with context – the key to a successful Industrie 4.0 / Digitalization strategy

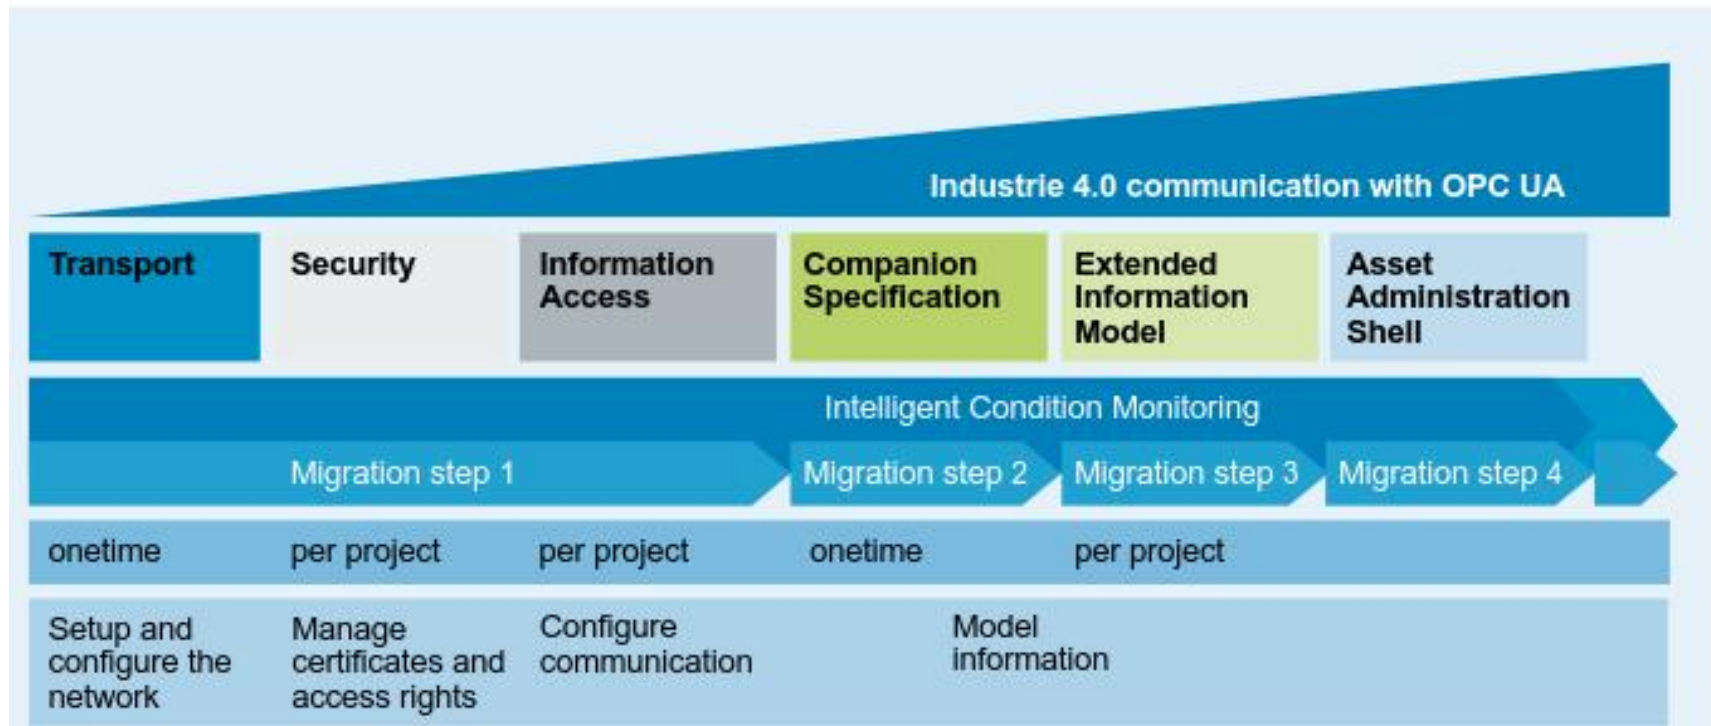

## OPC UA Connectivity

- Platform **independence** (C++, Java, ..., iOS, Windows...)
- **Scalability** through profiles
- Built in **security** features
- Standard internet and IP based protocols

## OPC UA Companion Specification (data models) available or work-in-progress

- E.g. for robotics, plastics and rubber machines, machine tools and manufacturing systems, machine vision, electrical automation, integrated assembly solutions
- OEM specific extensions possible

# Implementation guideline for OPC-UA available from VDMA – 4 steps to a successful OPC-UA implementation

Source: Industrie 4.0 Communication Guideline Based on OPC UA • VDMA • Fraunhofer IOSB-INA • 2017

# Industrie 4.0 is becoming reality with OPC-UA as its backbone for communication and information modeling

## Recommendations and help

Holistic process for strategy, testing and standardization

## Implementation

To provide industry knowledge

# Industrie 4.0 – a holistic approach to strategy, standardization and hands-on implementation

## PLATTFORM INDUSTRIE 4.0

### Building on the strengths

of the German industry and Mittelstand

Close cooperation among the private sector, academia, politics, trade unions and associations on thematic priorities: Reference architectures, research, security, legal aspects, work and education, platform economy

## Digital Transformation

### Coordinating approach to global standardization

Orchestration of cross-sector standards; strengthen international standardization cooperation in EU/worldwide

### Helping to find the right place for testing

Providing the access to the appropriate test lab; testing before productive use and standardization

“Industrie 4.0” has become a blueprint for implementation ...  
... worldwide

Plattform Industrie 4.0 and Siemens cooperates with all these initiatives worldwide

and others...

India?

Industry must transform on a global scale – reaching out for international collaboration

# “Industrie 4.0” has become a blueprint for implementation – let us jointly bring it to India

Plattform Industrie 4.0 and Siemens cooperates with all these initiatives worldwide

and others...

## Industry must transform on a global scale – reaching out for international collaboration

## “Industrie 4.0” for India – first steps achieved

**OPC Foundation hub in India founded October 23rd at the OPC day in Bengaluru, hub is hosted by Siemens in strong cooperation with CII and others industrial partners**

**CII can take the lead to build a systematic approach to Industrie 4.0 in India**

Thank you.
